

Aligned Access™

High Reliability Connections and Low-Latency Transport, Wherever You Need to Go

Aligned Access™ enables companies to expand their reach and dynamically connect to customers and partners; cloud, IT service and network providers; Internet Exchange (IX) platforms; and Internet Service Providers (ISPs) found within our data centers – and beyond. This allows customers to seamlessly adapt their hybrid IT needs and expand their network service capabilities and footprint with highly reliable connectivity and low-latency transport.

- Strategically located in regions with robust fiber infrastructure and fast internet connectivity speeds
- Aligned facilities offer neutral connectivity to a robust network of top-tier carriers and telecommunications providers by way of multiple diverse Meet-Me Rooms
- Modern network infrastructure and intuitive, Software-defined Network (SDN) seamlessly adapt to your hybrid IT needs

The Aligned Access™ Portfolio of Carrier-Neutral Connectivity Solutions Includes:

Aligned Cloud Access

To make the most out of cloud computing, you need the performance, reliability, speed, and security that only private connectivity offers. If your organization is connecting to its cloud provider over the public Internet, it faces potential security risks, data loss, and unpredictable drops in network availability.

Aligned enables hosted or dedicated direct connectivity to leading Cloud Service Providers (CSPs), including:

- Amazon Web Services (AWS), Azure, Google Cloud Platform, IBM Cloud, Oracle Cloud, Salesforce, and others from our data center locations in Ashburn, Dallas, Phoenix and Salt Lake City
- Connections offered at speeds ranging from 1Gbps to 100 Gbps that can be provisioned instantaneously
- Aligned's Cloud Access delivers a flexible and transparent structure to align with your business needs

Cloud Router

With Cloud Router, Aligned enables customers to easily connect multiple regions of a single Cloud Service Providers (CSP), connect multiple CSPs in the same region, or connect multiple CSPs in different regions over PacketFabric's Network-as-a-Service platform, allowing customers to completely bypass the public internet.

- Layer 2 and Layer 3 connectivity
- Highly optimized cloud-to-cloud transfers
- Complete control and transparency

Aligned DCI Access

Customers can connect their infrastructure, even when it's hosted in their own data centers, to and between all Aligned data centers and CSPs using our flexible, reliable Data Center Interconnect (DCI) virtual cross-connect network connectivity solution.

- DCI connections are offered at speeds starting at 1Gbps, and can be provisioned instantaneously
- Aligned's DCI Access features flexible and transparent month-to-month pricing backed by an industry-leading Service Level Agreement (SLA)

Aligned Transport Access

In conjunction with our network partners, Aligned Access™ offers carrier-grade Layer 2 and Layer 3 transport services to make connecting and extending your presence easier.

- Dedicated or Blended IP Bandwidth from a broad choice of ISPs
- Point-to-point, high-speed, low latency blended connectivity available through a variety of wholesale partners
- Dedicated protected and unprotected 10 Gigabit Ethernet channels enable reliable connectivity between our data centers and nearby carrier hotels

Aligned On-Net Access

Fully lit and available on-net at our carrier-neutral facilities, connections to your customers, partners and service providers within Aligned data centers offer seamless provisioning and turn-up, high reliability, and low latency at no monthly cross-connect fee.

Aligned IXP Access

Aligned customers in the greater Dallas market can now reach DE-CIX Dallas, the market's largest carrier and data center neutral IX with nearly 100 networks. Though a connection to DE-CIX via Aligned's Dallas data center, companies can fortify their network interconnection, improve network performance and gain access to a diverse and reliable solution..
