IBM Cloud

1.145 trillion MB per day

1.145 trillion MB of data is created every single day.

Source: DOMO

As the number of devices and applications continues to grow, organizations require a secure, high-performance and cost-effective way to manage their data and content.

Enter the Cloud

200+

zettabytes of data will be in cloud storage around the globe by 2025.

Aligned offers more flexible, scalable, secure and cost-effective connections to the cloud where and when you need them through Aligned Access™.

Aligned Access™ also enables customers to seamlessly expand their reach and dynamically connect to customers and partners; IT service and network providers; Internet Exchange (IX) platforms; and Internet Service Providers (ISPs) found within our data centers, as well as beyond them.

Reach

Aligned data centers provide on-ramps to major cloud providers, as well as connections from customer facilities or managed infrastructure, to and between Aligned data center locations

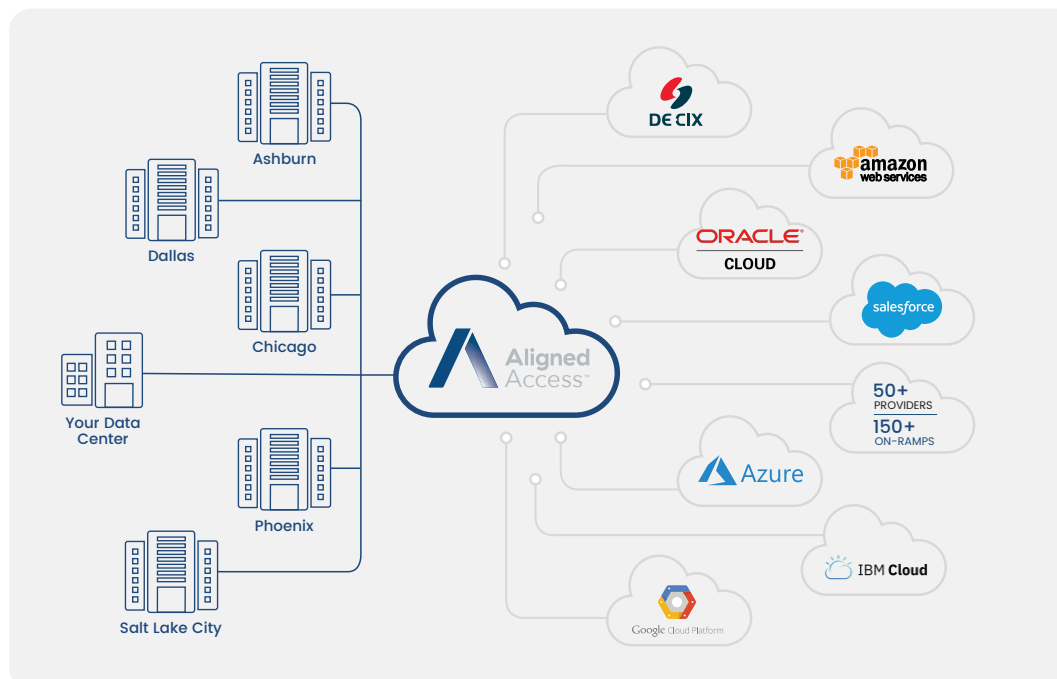

Agility

Flexible connections and scalable bandwidth as your business and workload grows and changes

Simplified Management

Eliminate complex configuration and lengthy provisioning as well as multiple contracts and SLAs

Aligned Access™ Solutions

Intelligent infrastructure, combined with incrementally scalable technology, allows us to more dynamically meet customer needs. Aligned Access™ solutions combine cloud, connectivity and colocation to suit the needs of your company. Our adaptable infrastructure and intuitive, Software-defined Network (SDN) seamlessly adapt to your hybrid IT needs.

Aligned Cloud Access

Secure, private and cost-effective hosted or dedicated direct connectivity to leading CSPs. Services can be provisioned from 1Gbps to 100 Gbps instantly from Aligned's data centers in Ashburn, Dallas, Phoenix and Salt Lake City.

Cloud Router

With Cloud Router, Aligned enables customers to easily connect multiple regions of a single Cloud Service Providers (CSP), connect multiple CSPs in the same region, or connect multiple CSPs in different regions over PacketFabric's Network-as-a-Service platform, allowing customers to completely bypass the public internet.

Aligned Transport Access

Carrier-grade Layer 2 and Layer 3 transport service offering blended or dedicated IP and point-to-point, high-speed, low-latency, connectivity through a variety of wholesale partners. Available in 10 Gigabit Ethernet increments as dedicated, protected or unprotected circuits.

Aligned DCI Access

Secure, low-latency, high-resiliency and cost-effective Data Center Interconnect (DCI) Access, enabling connectivity from customers' own facilities or managed infrastructure, to and between all Aligned data centers and connected CSPs.

Aligned On-net Access

Seamless, carrier-neutral provisioning and turn-up for highly reliable and low latency connectivity to customers, partners and service providers with no monthly cross-connect fees.

Aligned IXP Access

Aligned customers in the greater Dallas market can now reach DE-CIX Dallas, the market's largest carrier and data center neutral IX with nearly 100 networks. Though a connection to DE-CIX via Aligned's Dallas data center, companies can fortify their network interconnection, improve network performance and gain access to a diverse and reliable solution.

Aligned Data Centers are Strategically Located

Strategically located in regions with robust fiber infrastructure and fast internet connectivity speeds, our facilities offer neutral connectivity to a robust network of top-tier clouds, carriers and telecommunications providers by way of multiple diverse Meet-Me Rooms without monthly interconnection fees. Customer can deploy the speeds, solutions and connections they need.

Aligned Phoenix

- Robust internet connectivity
- Heavy concentration of top-tier telecommunications providers
- Internet speed and mobile networks in Phoenix are among the country's fastest

Aligned Dallas

- Robust internet connectivity
- Heavy concentration of top-tier telecommunications providers
- Internet speed and mobile networks in Dallas are among the country's fastest

Aligned Chicago

- Attractive sales and use tax incentives
- Located at the convergence of 12+ metro, longhaul and international networks
- Redundant, critical power from two substations

Aligned Salt Lake City

- Has the highest Internet speeds in the Intermountain West and among the highest in the nation
- Some of the most attractive data center tax incentives in the nation

Aligned Ashburn

- Hotbed of cloud connectivity
- Rapid and robust access to diverse fiber paths
- Low latency connections to national fiber backbone
